CANADA

Aerodromes, Navigation Aids, Weather Stations, Oceanic Control Boundary Intersections, Aeronautical Radiobeacons operated by Private Agencies and other Designated Intersections and Fan Markers.

Canadian Airports of Entry are listed with a Canadian relay facility. The hours of service for Customs are indicated following each Airport of Entry listing.

For those columns headed "Relay Fac CY---F" and "Ctr Z--" fill in the blanks with the ident in the column directly beneath.

NAS FIXES
NON-COMPULSORY RADIO FIXES

Following is a list of compulsory and non-compulsory radio fixes prepared by the National Flight Data Center. It contains the fixes in the NFDC files in effect on October 30, 1980. There are still some approach/terminal and oceanic areas fixes missing from these files.

The description includes the type of navigation aid the fix is based on. Here is the key:

C – VORTAC	LA – LDA
D – VOR/DME	LC – LOC
M – Marine NDB	LD – ILS/DME
R – NDB	LE – LOC/DME
T – TACAN	LO – LOM
U – UHF NDB	LM – LMM
V – VOR	LS – ILS
	ML – MLS
	RD – NDB/DME
	SD – SDF/DME
	SF – SDF

The waypoint contraction, WP, appears between the name and state. The symbol, M, for "military" is shown also between the name and state.

Only the waypoints are listed with both description and coordinates. It is planned to include the coordinates for all fixes eventually but that project is still sometime in the future.

The following additional abbreviations appear in the fix list:

AQ	American Samoa	HA	Haita
BF	Bahama Islands	JM	Jamaica
BI	British West Indies	MX	Mexico
59	Canada	NA	Netherlands Antilles
CN	Cuba	PN	Republic of Panama
DR	Dominican Republic	TQ	Trust Territory
EQ	Canton Island	TT	Trust Territory
FI	French West Indies	WQ	Wake Island

Since the identifiers for fixes are being phased out, no attempt was made to match up the remaining ones in this list. The remaining # LL identifiers are in Section C.

As fixes are converted to name-codes, they will be published initially in the National Flight Data Digest and included in a future publication.

Please send any comments, corrections or omissions for this section to AAT 430. We shall appreciate your contributions.

NAS FIXES
NON-COMPULSORY RADIO FIXES

Following is a list of compulsory and non-compulsory radio fixes prepared by the National Flight Data Center. It contains the fixes in the NFDC files in effect on December 25, 1980. There are still more approach/terminal and oceanic areas fixes missing from these files.

The description includes the type of navigation aid the fix is based on. Here is the key:

C – VORTAC	LA – LDA
D – VOR/DME	LC – LOC
M – Marine NDB	LD – ILS/DME
R – NDB	LE – LOC/DME
T – TACAN	LO – LOM
U – UHF NDB	LM – LMM
V – VOR	LS – ILS
	ML – MLS
	RD – NDB/DME
	SD – SDF/DME
	SF – SDF

The waypoint contraction, WP, appears between the name and state. The symbol, M, for "military" is shown also between the name and state.

Only the waypoints are listed with both description and coordinates. It is planned to include the coordinates for all fixes eventually but that project is still sometime in the future.

The following additional abbreviations appear in the fix list:

AQ	American Samoa	HA	Haita
BF	Bahama Islands	JM	Jamaica
BI	British West Indies	MX	Mexico
59	Canada	NA	Netherlands Antilles
CN	Cuba	PN	Republic of Panama
DR	Dominican Republic	TQ	Trust Territory
EQ	Canton Island	TT	Trust Territory
FI	French West Indies	WQ	Wake Island

Since the identifiers for fixes are being phased out, no attempt was made to match up the remaining ones in this list. The remaining # LL identifiers are in Section C.

As fixes are converted to name-codes, they will be published initially in the National Flight Data Digest and included in a future publication.

Please send any comments, corrections or omissions for this section to AAT 430. We shall appreciate your contributions.
